**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

**DETAILED ACTION**

***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Davis et al. (US 4954017) in view of either Frease (US 4664561) or Leonard et al. (US 5073064).

Davis et al. discloses a rock bolt comprising which includes a tubular section (3) which is expansible to effect a first anchoring action. Davis et al. discloses the invention substantially as claimed. However, Davis et al. lacks an expansion unit which is connected to the tubular section. Frease and Leonard et al. both teach an expansion unit (30,6) which is connected to a tubular section (28,22). It would have been considered obvious to one of ordinary skill in the art to modify Davis et al. to include the expansion unit as taught by either Frease or Leonard et al. and attached it to the tubular section in order to more effectively anchor the rock bolt.

Re claim 3, pressurized fluid can pass into an interior of the tubular section to expand the tubular section (see abstract of Davis et al.)

Re claim 5, bearing plate (13).

Art Unit: 3672

With regards to claim 9, it would have been considered obvious to modify the above combined references to include a coupling device in order to provide varying length rock bolts.

***Conclusion***

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sunil Singh whose telephone number is (571) 272-7051. The examiner can normally be reached on Monday through Friday 10:30 AM - 7:00 PM.
